

## Boom Barriers

### Description

Enhance security and control access with our cutting-edge Boom Barriers. Designed for a wide range of applications, from industrial facilities to public spaces, our Boom Barriers ensure efficient traffic management and security. With features like inbuilt anti-crash safety device, optional bar sensor, customizable auto-close function, and smooth operation, these barriers provide a seamless and secure solution for your access control needs.

The high torque motor delivers exceptional durability, while the white aluminum boom bar with reflective strips ensures high visibility. Our Boom Barriers are easy to install, with options in various lengths, and come with free maintenance. Enjoy the benefits of enhanced security and ease of use with Triple Play's Automatic Boom Barriers.

### Product Specification

- Inbuilt Anti-Crash Safety Device: Suspends boom movement upon collision.
- Optional Bar Sensor: Advanced vehicle detection for added safety.
- Customizable Auto-Close: Tailor the boom barrier's closing time.
- High Torque Motor: Powerful 600Nm torque motor for longevity.
- Smooth Operation: No jerks or snaps at end positions.
- White Aluminum Boom Bar: Enhanced visibility with reflective strips.
- IP54 Protection: Control unit is dust and water-resistant.
- Easy Installation: Available in 3, 4 & 5 meter lengths, with free maintenance.
- Optical Bar Sensor: Detects vehicle presence and controls boom movement.
- Access Control Operation: Can be operated through push-button or access control system.
- Manual Operation: Key-based mechanism for raising or lowering barrier during power failure.
- Versatile Applications: Ideal for tolls, parking areas, airports, residences, and more.
