

## Hand Held Super Scanner

### Description

High performance hand held metal detector made to meet the exact requirements of the security industry. It can be used for public security in airports, Railway stations, docks, prisons, and frontier defense as well control of medicine, food and other commodities. It is a high performance Hand Held Metal Detector made to meet the exact Requirements of the security industry. The detector is now operational although and increase in sensitivity and depth range can be achieved by turning the sensitivity adjuster until the LED turn to red and a constant audio tune is heard. Turn the sensitivity adjuster (anti-clockwise) until the red LED just turn to green the tone fades. Typical uses will include body look for offensive weapons like knife, gun and so on, Detecting metal articles for Factory and store. Sound alert LED indicator. If the detector is held still over a metal object the detection signal will automatically reduce.

### Product Specification

**Color:** Black

**Material:** Metal

**Power Source:** Battery Powered (One 9v battery required)

**Weight:** 450 Grams

**Dimensions:** 42 x 9 x 5 cm

**Style:** Compact

**Key Features:**

Enhanced Detection Circuitry

Dongated Coil-Head for Comprehensive Scanning

High Performance for Precise Threat Detection

Adjustable Sensitivity for Optimal Results

Sound Alert LED Indicator

Low Power Consumption with Battery Indicator

Compact and Lightweight Design
