

NV Monocular PVS-14

Description

The NV Monocular PVS-14 is a feature-packed night vision device built for superior performance in low-light conditions. See the unseen with 1x magnification and a wide 40° field of view, allowing you to navigate darkness with ease. Maintain natural night vision in one eye while viewing through the 25mm eyepiece with a comfortable 25mm eye relief. The PVS-14 boasts a high-quality lens system (25mm F#1.2) for exceptional light gathering and crisp image clarity. Adjust for perfect focus with a range of 250mm to infinity. This compact unit measures just 114×70×60mm and weighs only 310g for comfortable extended use. Power through the night with long-lasting battery options (AA or CR123A) delivering up to 30 hours of operation. An integrated infrared illuminator enhances visibility in extremely dark environments. Protect your vision with automatic highlight shutoff, and experience superior night vision with a genuine Euro Gen3 image intensifier tube. Built to withstand harsh conditions, the PVS-14 features a durable housing with an IP65 dust and water-resistant rating

Product Specification
