

Light Baton

Product Specification

Description

A light baton, often used in various performance arts and safety applications, is a versatile and illuminating tool designed to enhance visibility and create stunning visual effects. Whether it's twirled by a baton twirler, wielded by a traffic conductor, or incorporated into a dance routine, the light baton adds a captivating element to any performance or safety protocol. These batons come in various sizes, colors, and lighting patterns, making them adaptable to different needs and creative expressions. With advancements in LED technology, light batons are now more energy-efficient and customizable, allowing users to program different light sequences and intensities. This introduction to light batons will explore their uses, benefits, and the technology behind them, shedding light on why they have become an essential tool in both artistic and practical contexts.

- **Make:** Airborne Aero
- **Model:** AAS/LB/657
- **Count of Led Green:** 7
- **Total Length (Inch):** 21 Inch
- **Diameter of search light (mm):** 40 millimetre
- **Handle Length:** 6 Inch
- **Handle Material:** ABS Plastic
- **Count of LED Red:** 7
- **Pipe Material:** PVC
- **Light area Length:** 12 Inch
- **Type of front glass:** Toughened
- **Minimum Battery Backup:** 12 hrs
- **Charging Time:** 3 Hrs
- **Salient Feature:** Red Blink, Red stable, Green blink, Green stable, Touch on top, Buzzer, In built on/off switch, One Hand operated switch, Waterproof
- **Type of protection:** Protection against reverse polarity, Protection from battery over-discharge, Protection from battery over-charge, Short circuit protection
- **Accessories:** Battery Charger, Charger cable
